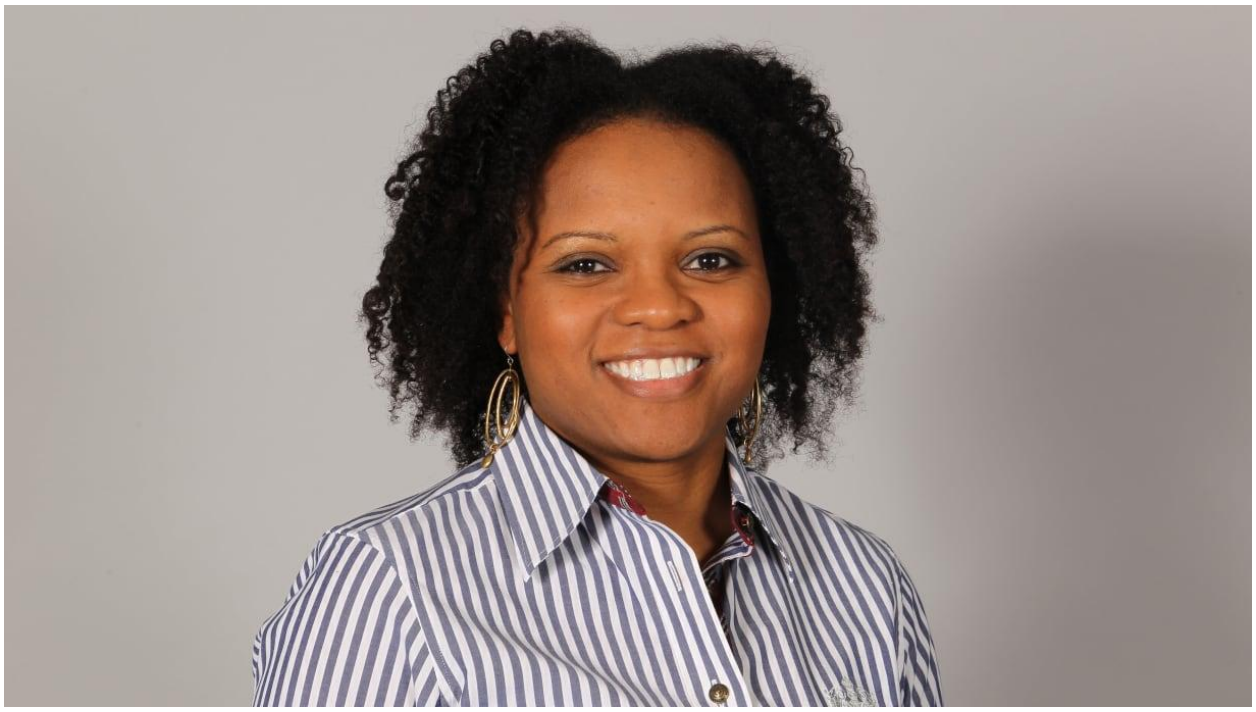
JACQUELINE DAVIDSON
Director of Football Research



Jacqueline Davidson is in her second season with the Buccaneers as the Director of Football Research in 2021. Born in Tuscaloosa, AL, she graduated from Davidson College in 2002 with a Bachelor of Arts degree in economics, Davidson earned a Juris Doctor from Cornell University School of Law in 2005 and she is a member of the New York State Bar Association.

Davidson is responsible for supporting the front office and coaching staff in roster and strategy decisions through research and development of analytical tools and methods. She also works alongside General Manager Jason Licht and Vice President of Football Administration Mike Greenberg on player contracts and salary cap decisions.

Following Super Bowl LV, Davidson played a vital role in helping the Buccaneers bring back all 22 starters, including a total of six free agent re-signings and two contract extensions. This marked the first time in the salary cap era that a defending Super Bowl champ has returned all 22 starters.

Before joining the Buccaneers, Davidson spent 11 seasons working in football administration with the New York Jets, spending eight-plus years as the Manager, Football Administration from 2007-15 before being elevated to Director, Football Administration (2015-18).

DR. MEENAKSHI JAIN
Board Certified Ob/Gyn

Dr. Meenakshi Jain is a board certified Ob/Gyn and is subspecialized in minimally invasive and Robotic surgery. She has successfully completed about 1200 Robotic surgeries in the last five years and is a very busy solo gynecologist practicing in St Petersburg area. She has lectured about the benefits of Robotic surgery all over USA and abroad. She is a **mentor and a proctor for the Epicenter at St Petersburg General Hospital**, one of two Epicenters in Florida, where she teaches Robotics to surgeons from all over USA. She has been involved in starting many Gyn Robotic programs in India and has been a speaker in GOPIO, RCOG, Global health initiative conferences there.

She also specializes in an innovative minimally invasive procedure called **InterStim therapy for management of Urinary and Fecal Incontinence.** This innovative Neuromodulation Pacemaker has given tremendous relief to many women by providing them with an excellent quality of life after they had been suffering with these socially disabling disorders for years.

She has been featured in many newspaper articles and also has been interviewed on many television channels. She has developed and published a unique technique **" THE JAIN TECHNIQUE"** of Robotic docking and instrument selection which has made her statistics of safety and of successful completion of minimally invasive surgery better than most published studies and thus reduced markedly the need for laparotomy.

She believes in not just making her patients feel good but look good. She has recently acquired **ICON and VECTUS LASER** for skin tightening, rejuvenation and for permanent laser hair removal for all skin types.
